Awareness program: Poster Making on Gender issues in Indian society

10th October 2018

Creating a more inclusive and equal society requires increasing understanding of gender issues. Gender inequality still exists in many ways and affects people's rights, opportunities, and general well-being even with tremendous advances. Social justice and human development depend on our ability to comprehend and solve these problems. One effective strategy for overcoming gender bias and preconceptions is education. We can raise a more aware and courteous generation by including gender studies into school curricula and providing training on gender sensitivity. The media is also very important; news articles, films, and social media campaigns can draw attention to gender inequality and advance equality.

OCE, Department Of Education organized "Poster Making" on 10th October 2018 to bring out the creative expression of students and also to bring social awareness. The theme for the Poster Making competition was "Gender issues in Indian society"
